Lance R. Collins is serving his second term as the Joseph Silbert Dean of Engineering at Cornell University. He was part of the leadership team that successfully bid to partner with New York City to build Cornell Tech, which opened its Roosevelt Island campus in 2017. Collins has accelerated the college's efforts in diversity. Since 2007, Cornell Engineering tripled the proportion of underrepresented minority students from 7 to 21 percent; over the same period, undergraduate women increased from 28 to 50 percent, more than twice the national average. For these efforts, he received the inaugural Mosaic Medal of Distinction from Cornell Mosaic and the Edward Bouchet Legacy Award from the Bouchet Graduate Honor Society. Collins is a professor of mechanical and aerospace engineering. His research is focused on the application of direct numerical simulation to a broad range of turbulent processes. He has been elected fellow of the American Physical Society, the American Association for the Advancement of Science, and the American Institute of Chemical Engineers. In 2014, he received the William Grimes Award from the AIChE. Collins graduated from Princeton in 1981 with high honors and holds a Ph.D. from the University of Pennsylvania, all in chemical engineering.
