Notes

The 2014 budget will be closed in March/April 2015.

¹ Programming supported was increased to 2.5FTE from 1.5FTE in CY13. A new position of a scientific director at .20-.40FTE was created in 2014. Midyear revision included additional support for student and a new contract position for a General Physics moderator. Per MAB/SAB board approval in 2013, all **additional** staff costs will be drawn from development reserves.

² Indirect cost percentages are derived from the University negotiated indirect cost rates. These indirect costs include those for Administration (Library and Departmental) and Staff Support (Finance/Budget, Human Resources, Facility staff, and Staff IT).

³ Indirect cost percentages are derived from the University negotiated indirect cost rates. These indirect costs include maintenance, custodial, utility and other facility related costs for the building.

⁴ Projected net changes in reserves were revised in order to remove the costing of the scientific director, 1.0FTE programmer, and general physics moderator from direct expenses. See footnote one for more information.
