Challenge:

Low Trust = Reduced Speed, Increased Costs

In today’s global economy trust-related problems like redundancy, bureaucracy, fraud, and turnover eat away at an organizations profitability in the form of slowed productivity, diverted resources, and missed opportunities. What’s more, a lack of trust among customers chips away at its brand reputation.

Trust: The Key Force in Today’s Economy

Historically, trust has been considered a “soft issue,” but new research is turning this age-old assumption on its head, demonstrating that trust has a measurable, observable, and relevant effect on an organization’s bottom line. As Stephen M. R. Covey, author of the best selling book, *The Speed of Trust*, puts it, “The serious practical impact of the economics of trust is that...we are paying a hidden low-trust tax right off the top—and we don’t even know it!”

Solution:

Trust Begins With Leaders

Leading at the Speed of Trust is a two-day workshop that raises trust from an often-ignored asset or liability to a strategic advantage in the marketplace. Doing business at The Speed of Trust dramatically lowers costs, speeds up results, and increases profits and influence.
