Data Frequency: Yearly
Data Volume: Differs from one unit to the next
Currently Exists?: Yes
Proposed Solution: Unknown

Description

« Hide

Once the unit has completed their planning, they will put together a text file of SIP data and send it to Budget for upload into the database. It is only run during the budget cycle, and it is run separately for each unit that returns SIP data, and it could be run multiple times if they need to make corrections and load it again.
