• established in 1991 by Paul Ginsparg

• has been hosted at Cornell since 2001

• includes 731,000 e-prints

• 2011
  – 76,578 new submissions
  – ~50 million downloads

**Key Principles**

• arXiv is an open access service, free to submitters and users alike

• arXiv is a culturally embedded resource that provides value to a global network of science researchers

• arXiv has a moderation system to ensure content quality

• arXiv complements, rather than competes with, the commercial and scholarly society journal publishing market

Interim Sustainability Model 2010-2012

3-year collaborative support model with voluntary contributions from libraries and research institutes

- Target the top 200 based on downloads from institutional domain names

  - Annual contribution tiers per institution:
    $4,000  $3,200  $2,300

  - MOUs with key partners including UK/JISC, TIB, Helmholz, Max Planck, Japan

  - CUL covers 15% of annual expenses plus indirect costs (35% of direct – derived from Cornell’s negotiated rates)

2010-2011: Sustainability Planning Outcomes

Review and stabilize arXiv staffing and organization:

– Define roles for management, IT development, and user support with clear lines of reporting and responsibility
– Establish a sustainability advisory group
– Start streamlining communication with the scientific advisory board
– Structure the arXiv budget within CUL accounting as an externally funded in support of audits and accountability
– Start transitioning daily moderation role from Paul Ginsparg to CUL

2010-2011: Sustainability Planning Outcomes

Evaluate arXiv’s IT infrastructure

– Begin migrating the search and display architecture to Invenio (collaboration with CERN)
– Participate in the ORCID initiative
– Assess the preservation status of arXiv and consider CUL’s archival repository, Portico, and CLOCKSS
**2010-2011: Sustainability Planning Outcomes**

Assess arXiv’s functionality and user support

- Start an initial usability study in support of Invenio-related web interface changes
- Initiate a review of arXiv user guides and help pages
- Participate in NSF-funded Data Conservancy research data pilot
- Analyze arXiv use statistics and usage patterns
  - Sample submission-based statistics to compare institutional use and submissions (similar pattern)
  - Based on an analysis of 1,000 arXiv papers, sample representation of NSF-funded research paper in arXiv (~10%)

Hold discussions with a group of publishers and societies about collaboration opportunities

- Operational vs. research & innovation budget
- Collaboration areas: Cross linking & versioning; supplementary materials including data; streamlining submission process; author ID and authentication; statistics & business intelligence; content enrichment
