AWS GameDay

Mann Library, Stone Classroom, Room 103

Unicorn.Rentals

Welcome to the Legendary
Animal Rental Market (LARM)!

AWS GameDay throws you into the world of the Legendary Animal Rental Market as an employee of one of Silicon Valley's most beloved start – ups, *Unicorn.Rentals*.

You'll take part in an interactive, team-based exercise, designed to allow you to learn AWS (and put your knowledge to the test!) in a gamified, risk-free environment. Learn through collaboration as we step outside the boundaries of typical workshops with open-endedness and ambiguity.

There is no one right answer; the path you take is up to you and your team. Use the resources at your disposal in pre-packaged AWS accounts.

AWS GameDay is a completely hands-on opportunity for users of all levels to learn about best practices, new services, and architectural patterns in AWS.
