

FOLIO *at* CUL

THE YEAR AHEAD

FEBRUARY 9, 2022

Agenda

- Community Council Update and Goals of the AUL for IT - Simeon Warner
- Product Council Update and FOLIO Release Roadmap - Jesse Koennecke
- Technical Council Update and CUL Security Team Overview - Phil Robinson
- CUL Support and Governance - Tom Trutt
- CUL FOLIO Priorities and Feedback - Debra Howell
- Reporting Update - Sharon Beltaine

Community Council Update & Goals of the AVL for IT

Simeon Warner

FOLIO Community and Governance

or, what on earth is the Community Council?

Community Council

Foster a healthy and productive community ecosystem of sustainable collaboration for the FOLIO project

Product Council

- Outreach and onboarding
- Resourcing
- Oversee governance, policies, etc.
- Elections
- Budget and staffing
- Dispute and conflict resolution

Technical Council

What has the Community Council done?

- Transitioned from OLE to FOLIO as an OLF project
- Successful implementation of governance model, initial council elections
- Membership/fundraising provided funds for technical infrastructure and 2 staff
- Progress on community communication
- Laid foundation for many regular processes (such as the 2022 membership campaign now starting)
- More to do: onboarding, more community development, maintenance and sustainability, outreach, ...

Goals

Make our FOLIO work for us! Improve staff productivity and satisfaction

- Solidify internal support and governance: CUL-IT technical support, FOLIO Governance Committee (inc. Security sub-committee), and FOLIO Functional Support Team for CUL
- Prioritize our needs, find ways to make top priorities happen, track upcoming releases
- FOLIO–ArchivesSpace integration - phase 1 nearing completion, then need to plan next steps
- Reporting - build on existing work and explore additional options to meet needs
- Smooth FY rollover

Build larger healthy FOLIO community

- Engage with FOLIO community at many levels (councils, SIGs, partner libraries, development, linked data)
- Describe and promote FOLIO (e.g. Jenn & Debra IJoL [article](#), CNI [presentation](#))
- Form US Research Library group

Product Council Update & FOLIO Release Roadmap

Jesse Koennecke

Product Council

Community Council

Product Council

Technical Council

To maintain the FOLIO roadmap to reflect the best interests of librarians and users and to work with the development teams to deliver the roadmap as efficiently as possible.

11 elected members

Jesse Koennecke

- Elected to current PC
- Serving as co-chair
- CUL's appointed member of previous incarnation of PC - 2017-2021

Product Council

PC Description

The FOLIO Product Council guides the functional development of the FOLIO Library Services Platform. The Product Council manages the scope of the FOLIO product.

PC has the key responsibility of providing the product vision, strategy & roadmap with close collaboration with the Community and Technical Councils...

Product Council

**FOLIO Functional
Roadmap**

**Feature ranking
and prioritization**

**Working closely
with the SIGs, POs,
and the other
Councils**

SWOT Analysis

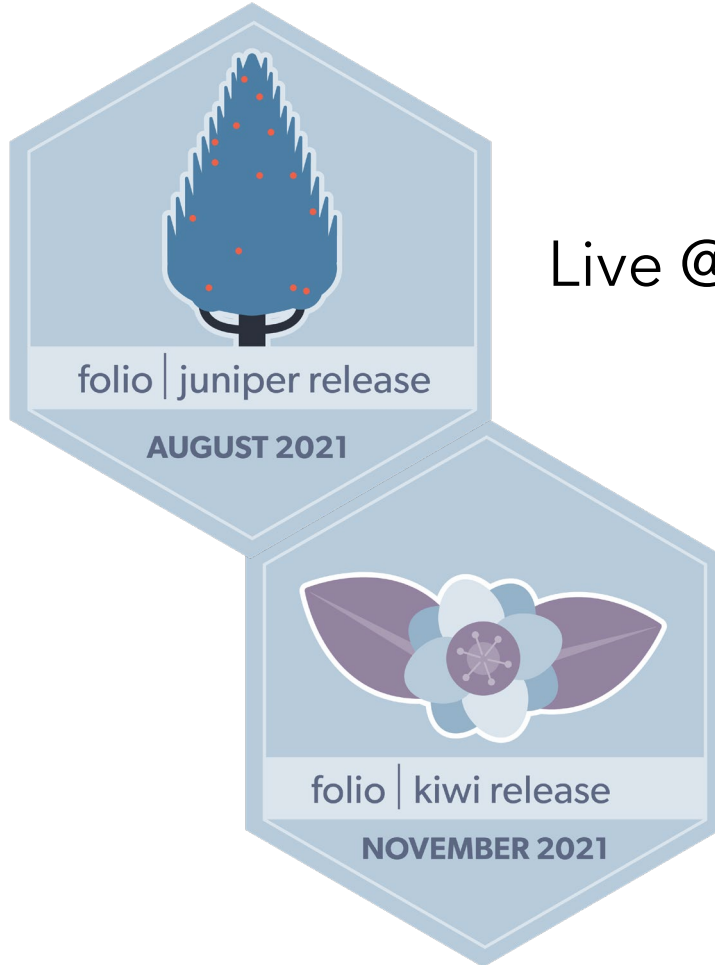

**Long-term release
strategy**

**FOLIO functional
scope review - what
functionality is core
to what libraries
need?**

FOLIO Roadmap - work in progress²

Theme	Sub-Theme	2021	2022	2023	Future
Customizations and user preferences	Customization in user management				
Bulk Edit					
Bulk Edit	Acquisitions bulk edit				
Bulk Edit	Inventory bulk edit				
Bulk Edit	Users bulk edit				
Acquisitions cross app enhancements					
Acquisitions cross app enhancements	ERM-acquisitions data from the ERM				
Acquisitions cross app enhancements	Requests- acquisition links to requests				
Acquisitions Enhancements and Refinements					
Acquisitions Enhancements and Refinements	Invoices enhancements				
Acquisitions Enhancements and Refinements	Organizations enhancements				
Acquisitions Enhancements and Refinements	Orders enhancements				
Acquisitions Enhancements and Refinements	Receiving Enhancements				
Tags Enhancements					
ERM Agreements: Enhancements					
ERM Agreements: Entitlement log					
ERM Agreements: Enhancements to Local KB import					
Documentation					
Inventory Search					
Inventory Search	Inventory Elasticsearch				
Inventory Search	Back-end integration, initial front-end work				
Inventory Search	Faceted searching				

Release Schedule - recent

Live @ CUL - December 2021

Testing Dry Run Now

- Elastic Search in Inventory
- Improvements to data import and EDIFACT

Release Schedule - 2022

CUL - May/June

- Data import Phase 1
- Bulk edit proof of concept
- Optimistic Locking
- MARC authority records

CUL - October/November

- Data import Phase 2
- RUSH indicator in receiving
- Order importing improvements
- Circulation slip workflow and printing improvements
- Multiple service point improvements

Technical Council Update & CVL Security Team Overview

Phil Robinson

Technical Council

Community Council

Product Council

Technical Council

To set the general technical direction of FOLIO, provide technical guidance to the other Councils, lead technical evaluations and onboarding, set technical standards

11 elected members

Phil Robinson

- Elected to current TC in 2021, as the Cornell representative

FOLIO Technical Council

The role of the Technical Council (TC) is to set general technical direction, provide technical guidance to the Product Council, lead technical onboarding, set technical standards, and mediate technical disagreements amongst the community when needed.

There are 11 members, elected by the worldwide FOLIO community.

Phil Robinson was elected to the TC last summer and has been attending its meetings since July 2021.

FOLIO Technical Council

- The TC has been working on the high-level vision, strategic objectives, and initiatives of the FOLIO project, in conjunction with the Product Council and Community Council.
- Recently the TC has led technical evaluations of various new FOLIO apps and features (LDP app, Bulk Edit, etc). Typically, the requests come in from the PC or a Product Owner (PO).
- The TC is working on refining FOLIO module technical acceptance criteria and evaluation processes
- FOLIO Technical Road Map
- More information at <https://wiki.folio.org/display/TC/Technical+Council>

CUL FOLIO Security Subcommittee

- **The FOLIO Security Subcommittee (FSS)** formed in November 2021.
 - Comprises 6 CUL staff members from a variety of areas
 - Phil Robinson, Director of Library Systems, is Chair, responsible for convening the group as needed and making decisions on unclear security situations that require an independent decision.
- Members as of 11/8/2021: Phil, Vandana Shah, Jean Pajerek, Lisa Maybury, Andy Horbal, and Amy Blumenthal.

CUL FOLIO Security Subcommittee

Responsibilities

- *The FSS is responsible for overall FOLIO security governance and best practices at Cornell, including managing FOLIO user permissions at Cornell. Among the specific duties of the FSS are:*
- Assigning, updating, and removing staff and student employee permissions when user assignments change (new hire, change in duties, departure, etc.). Security requests will be initiated and sent by CUL HR or the user's supervisor to **folio-security@cornell.edu**. Supervisors may request changes to their own permissions, or to their staff members'.

Thank you to everyone who has begun using this process to onboard FOLIO users!

CUL FOLIO Security Subcommittee

The FSS works as a team to promptly respond to incoming FOLIO access requests, which come in via the folio-security EGA to our FOLIO security queue in TeamDynamix (TDX).

This January we handled many requests to set up hundreds of Spring student employees with FOLIO permissions. We currently capture the permissions updates in spreadsheets but are seeking a programmatic solution.

The FSS will maintain and publicize documentation on FOLIO permission descriptions to help guide decisions on permission assignments.

If new permissions sets are needed, the FSS will discuss them and create them as appropriate.

Members of the FSS should also stay up to date on changes in FOLIO permissions and permission sets as hot fixes and new releases come out. They will regularly update the permissions documentation as appropriate.

More information at <https://confluence.cornell.edu/display/folio/Security>

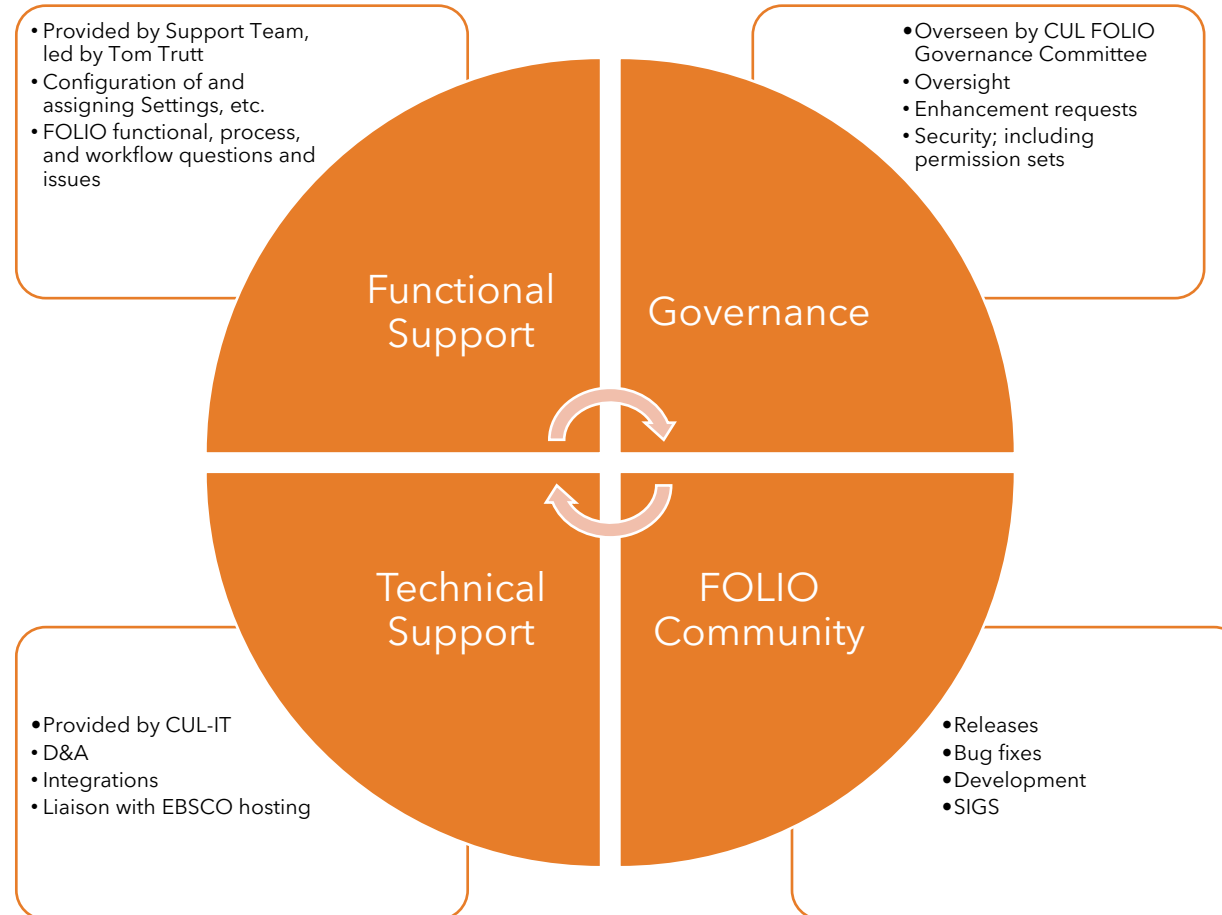

A decorative horizontal line of small, light blue dots is positioned at the bottom of the page, extending across the entire width.

CUL Support & Governance

What should I submit?

Everything.....

- Multiple reports of an issue helps us identify trends and impact on staff.
- Someone may have not reported the issue you are seeing.

"There are naive questions, tedious questions, ill-phrased questions, questions put after inadequate self-criticism. But every question is a cry to understand the world. There is no such thing as a dumb question."

— Carl Sagan, *The Demon-Haunted World: Science as a Candle in the Dark*

CUL FOLIO Survey Feedback & Priorities

Debra Howell

Does FOLIO provide you with the functionality you need to efficiently do your job?

#	Field	Minimum	Maximum	Mean	Std Deviation	Variance	Count
1	3. Does FOLIO provide you with the functionality you need to efficiently do your job?	1.00	4.00	2.13	0.78	0.61	48

"Maybe" or "No" Themes:

Too slow; APIs not performant

Too many pop-ups

Reporting issues; LDP difficult to use

Prior history not loaded into FOLIO

Invoicing, receiving, and order issues

Cataloging is clunky

Printing is big problem

Is there any kind of training you would like to have in order to make your job easier?

Field	Minimum	Maximum	Mean	Std Deviation	Variance	Count
5. Is there any kind of additional training you would like to have in order to make your job easier?	1.00	4.00	1.77	0.85	0.72	48

Themes:

A refresher on dBeaver and SQL reporting

Learn how to batch load records from vendors

Item records: how to find what you need

Re-start the drop-in FOLIO “any questions” sessions; include “Tips & Tricks”

More demos; especially for acquisitions

Is FOLIO work in other areas impacting your own FOLIO work?

#	Field	Choice Count
1	No	34.88% 15
2	Sometimes	34.88% 15
3	Yes	30.23% 13
		43

Themes:

Bulk editing (lack of)

Overall performance; wait times

Data import's slowness and instability impacts anyone who uses Inventory

Which of the following best describes your current overall productivity level with FOLIO?

#	Field	Choice Count
1	More productive than with Voyager	6.25% 3
2	As productive as with Voyager	29.17% 14
3	Less productive than with Voyager	52.08% 25
4	I don't know/difficult to compare	12.50% 6
		48

“More” or “Less” Themes:

Less

- Things seem to be more difficult and take more time in FOLIO than it did in Voyager
- Sending POs via EDI will increase productivity

More

- The Fast Add feature is very helpful
- Easier to do everything electronically

What do you like
best about
FOLIO?

- Web-based
- Being able to look up patrons by NetID
- The Community
- Open-source
- Easier to train student circ staff
- Paperless
- Intuitive
- Agreements app
- We survived the first 6 months!

CUL FOLIO Priorities

Performance

- Including addressing survey feedback
- Upgrades!

Development of highest impact issues

- Prioritized list from LTS
- Holly's observations of circulation and cataloging

Bug fixes

- [Known Issues & Statuses](#)

Reporting

- Completion of "go-live" reports
- Addressing survey feedback

Reporting

Sharon Beltaine

Reporting: Teamwork

- Reporting Team
 - This dedicated group of part-time contributors from various functional areas of the library has enabled the Cornell Library to transition from Voyager to FOLIO reporting
- New Skill Sets
 - SQL programming
 - Understanding FOLIO data models
 - New reporting applications and reporting database structure

FOLIO Reporting Team

Reporting Tomorrow: LDP Dashboards

- Interactive data visualizations for LDP FOLIO datasets created with Tableau Desktop and posted to Cornell's Tableau server
- CUL staff will be able to view and filter dashboard data using the free Tableau Reader application

Reporting Tomorrow: Metadb

Reporting Tomorrow: LDP Query Builder App

The screenshot shows the LDP Query Builder App interface. At the top, there is a navigation bar with the LDP logo and several menu items: Agreements, Bulk edit, Check in, Check out, Circulation log, Courses, Data import, and D. Below the navigation bar is a sidebar with a 'Navigation' section containing 'Query builder' (highlighted) and 'Saved queries'. The main area is titled 'Query builder' and contains the following sections:

- Schema:** A dropdown menu set to 'public'.
- Table:** A dropdown menu set to 'user_adresstypes'.
- Filter by column:** A form with a dropdown for '(Column)', an equals sign, and a text input for '(Value)'. Below this is an 'Add filter' button.
- Show columns:** A dropdown menu showing 'address_type X' and 'desc X'.
- Order by column:** A form with a dropdown for 'address_type', a dropdown for 'Ascending', and a dropdown for 'Nulls at end'. Below this is an 'Add ordering criterion' button.
- Limit number of results:** A dropdown menu set to '100'.

At the bottom of the interface, there are 'Submit' and 'Clear' buttons, the text 'Found 6 records', and a 'CSV' button.

* The LDP Query Builder App will be available in the Lotus FOLIO Release

Reporting Tomorrow: Summary

- Building a Reporting Production Support Model
- Continue to Grow CUL Reporting Services, Support, and Development
- Transition from LDP to Metadb
- Integration of LDP Query Builder App into reporting services
- Integration of non-FOLIO data into reports (e.g., ARES, Voyager)
- Local derived table development
- Data Visualizations via Tableau Dashboards from FOLIO LDP/Metadb
- Report automation
