

Student Library Advisory Council Meeting Minutes

Monday, April 18, 2016

5:00-6:30pm

703 Olin Library

1. Welcome - Anne Kenney

2. **Digital scholarship** - At the last meeting, we discussed the implications the College of Business might have on library services. This time we invited three students and two library staff to demonstrate the possibilities that digital technologies afford for new forms of scholarship. We are interested in your thoughts about how the library can support students as they navigate the digital research environment.

The presenters include:

Mia Tootil, graduate student

Sam Carter, graduate student

John Wyatt Greenlee, graduate student

All three of them are former Library Digital Humanities Fellows, Mia and Sam are both HASTAC scholars and Mia and John are current library DH interns. They discussed their projects and some of the technologies they have used—Neatline, Scalar, mapping, etc.

Michelle Paolillo, Library

Jason Kovari, Library

Jason focused on web archiving and the WayBack Machine.

Michelle will focused on HathiTrust Research Center:

http://prezi.com/o1qkon4lepro/?utm_campaign=share&utm_medium=copy&rc=ex0share

I have added a few links there to allow for exploration. Please feel free to contact me as you explore the potential of HathiTrust and the HathiTrust Research Center in relation to your scholarly pursuits.

In addition, for those interested in image analysis, there is a great example in action at Ukiyo-e: <https://ukiyo-e.org/>. This site provides ability to search for Japanese woodblock prints by entering search terms, or supplying an image. The collection is a compilation of many [sources](#), including museums, universities, and art dealers. The technology employed is edge-matching, as explained in the general [introduction video](#).

3. Your issues and concerns
