Cognition and Neural Systems (CNS) Journal Club

Spring Semester 2017-2018

The Cognition and Neural Systems (CNS) Journal Club (nee' BCS Journal Club) meets on Tuesdays from 11:45 to 1:00 pm in Uris Hall 205. Papers and notes from previous semesters can be found in the CNS (BCS) meeting archive.

Presentations in the CNS JC are intended to "show us what you are interested in"; i.e., present work within your subfield that illustrates why it is interesting and broadly applicable. It is less important to choose papers that you think will be close to every attendees' heart than it is to choose papers that are blisteringly important or interesting or controversial in your own subfield, and explain/share this with the group. It's good for all of us. The corollary is that journal club members don't decide whether to attend in a given week based on what is being presented.

Presenting your own work is always welcome, in whatever manner you like.

To add yourself to the mailing list, send a plain-text email to bcs-L-request@cornell.edu with the body of the message saying simply join. The subject line doesn't matter. Sending the message leave instead will unsubscribe you from the list. See Cornell's Lyris HowTo page for further details.

You can enroll in the CNS Journal Club for graduate or undergraduate credit (1 CR, S/U) as a Topics in Biopsychology seminar: PSYCH 6271. The course requires that you present at least once during the semester and participate actively overall. You are welcome to attend without enrolling, of course, but we do appreciate you enrolling if you plan to attend the whole semester and to present.

Please contact Thomas Cleland or David Smith with any questions.

28 August 2018: Organizational Meeting

4 September 2018: Dave Bulkin

11 September 2018: Marissa Rice

18 September 2018: Santiago Forero

25 September 2018: David Katz

2 October 2018 (t): Jack Cook

9 October 2018: FALL BREAK - NO MEETING

16 October 2018: Dev Laxman Subramanian

23 October 2018 (t): Wen-Yi Wu

30 October 2018: Justas Birgiolas, University of Arizona (Postdoc candidate with Thom Cleland)
6 November 2018: SOCIETY FOR NEUROSCIENCE - NO MEETING

13 November 2018: Lisa Hiura

20 November 2018: Celine Cammarata

27 November 2018: Mary Elson

4 December 2018: ARTICLE POTLUCK

- Bring your favorite, most insightful, most surprising, oddest, or otherwise somehow compelling article or bit of data to share with the group (time limit of 5-10 min each).
