## Hydraulic Design

### Overview

The hydraulic design group focuses mainly on the standardizing of the hydraulic profiles of all AguaClara treatment plants. All MathCAD programs for the hydraulic design are kept here: [Hydraulic Design Programs](#). Our team deals with all progress reports of the current construction of the AguaClara plants in Honduras. All progress reports and responses are kept here: [General Progress Reports](#).

### Goals

Our team has separate page for our list of goals and sub goals. This page is consistently edited and updated with new deadline dates and new goals: [Spring 2008 Goals](#).

For weekly updates you can refer to our meeting minutes: [Hydraulic Design Minutes](#).
