Data Source	Version	Status	Notes
eBird	1.1	deployed	enhances and supersedes v1.0 API

NOTE: Please migrate to Version 2.0 of the APIs. These 1.1 APIs are no longer available

Endpoints

- **ebird.org/ws1.1**

This is the root of version 1.1. of eBird-specific web services.

- **ws1.1/data**

This path contains data services.

- [ws1.1/data/obs/geo/recent](#)
returns recent nearby observations
- [ws1.1/data/obs/geo_spp/recent](#)
returns recent nearby observations of a species
- [ws1.1/data/obs/hotspot/recent](#)
returns recent observations at hotspots
- [ws1.1/data/obs/hotspot_spp/recent](#)
returns recent observations of a species at hotspots
- [ws1.1/data/obs/loc/recent](#)
returns recent observations at locations
- [ws1.1/data/obs/loc_spp/recent](#)
returns recent observations of a species at locations
- [ws1.1/data/obs/region/recent](#)
returns recent observations in a region
- [ws1.1/data/obs/region_spp/recent](#)
returns recent observations of a species in a region
- [ws1.1/data/notable/geo/recent](#)
returns recent nearby notable observations
- [ws1.1/data/notable/hotspot/recent](#)
returns recent notable observations at hotspots
- [ws1.1/data/notable/loc/recent](#)
returns recent notable observations at locations
- [ws1.1/data/notable/region/recent](#)
returns recent notable observations in a region
- [ws1.1/data/nearest/geo_spp/recent](#)
returns nearest locations with observations of a species

- **ws1.1/product**

This path contains products consisting of aggregated raw data.

- [ws1.1/product/obs/hotspot/recent](#)
This service provides a summary of recent sightings for birding hotspots.

- **ws1.1/ref**

This path contains supporting lookup services for the /data and /product services

- [ws1.1/ref/taxa](#)
returns species in the ebird taxonomy
- [ws1.1/ref/hotspot/region](#)
provides a list of eBird hotspots for a given region, optionally filtered to those with recent data
- [ws1.1/ref/hotspot/geo](#)
provides a list of nearby eBird hotspots, optionally filtered to those with recent data
- [ws1.1/ref/location](#)
returns location-based look-up data

- **ebird.org/wstools1.1**

This is location of gadget code and demo pages.

- **ebird.org/tools/google**

This is location of original gadget code and demo pages.

- [ebird.org/tools/google/notable-birds.xml](#)
This is location of gadget code for notable birds by state within the US.
- [ebird.org/tools/google/notable-birds-canada.xml](#)
This is location of gadget code for notable birds by province/territory within the Canada

- **ebird.org/wsresource1.1**

This is the root of the static resources that version 1.1 of the web services require.

- **wsresource1.1/images**
 - **wsresource1.1/css**
 - **wsresource1.1/js**

Making Sense of Endpoint URLs

There is a rational behind the URLs we use for endpoints. [Find out what they mean.](#)
