

# eBird-1.1-URIPatterns

URL PATTERN: /WHAT-IS-RETURNED/HOW-IS-IT-QUERIED/TIME-FRAME-OF-INTEREST

## what-is-returned

- notable - notable sightings only
- obs - all sightings
- nearest - nearest sightings of a species from a given point.

## how-is-it-queried

- geo - sightings within a circle defined by a lat/lng and distance.
- hotspot - sightings at hotspots.
- region - sightings within specific regions

Append "\_spp" to any of these patterns for recent observations of a particular species.

## time-frame-of-interest

recent - recent (within last 30 days) sightings only
