

# AguaClara Settling Systems Meeting Minutes 4.17.09

## AguaClara Settling Systems Meeting Minutes

Spring 2009 Minutes

4.17.09

### Accomplishments

- I received a quote on Brentwood tube settlers from a sales rep in New York named Dave Krichtin of 8 dollars per cubed foot.
- I received and estimate of the active area of the Gracias settlement tank from Sara.
- I also have contacted a sales rep in Mexico named Gilberto Anguiano, email [anguianoawa@megared.net.mx](mailto:anguianoawa@megared.net.mx) who was very helpful and he is going to quote me for the Gracias tank and for the shipping of the settlers to Southern Honduras. I have requested the specs of the tube settlers that we could choose from.
- Next I located a company called Enviropax that custom makes plastic tube settlers. I have talked to an international sales rep named Jim Devery, email [j.devery.sfia@gmail.com](mailto:j.devery.sfia@gmail.com). He has requested a drawing of the settling tank and other details about our tanks. He is going to locate a quote and a price to have it shipped to Honduras. This option sounds like it is going to be too expensive.

### Tasks for Next Week

- I am going to call a sales rep for siemens in south America.
- I am going to look into having the Brentwood tube settlers to Honduras from New York.
- Continue to look for other companies that produce metal and plastic plate settlers.
- Continue to stay in contact Gilberto Anguiano.
- Send Jim Devery the information that he has requested.
- Look into an alternative, cost effective and efficient way of connecting the plates that we already use in Honduras.
