Spring 2009 Semester Contribution

I am on the [Chemical Dose Controller](#)/ Rapid Mix Design Team this spring semester. I have worked on the MathCAD file to design the nonlinear Chemical Doser which we are in the preliminary stages of building. I have worked on the design and calculations for the rapid mix tank at the Gracias Plant and the incorporation of the design into the Master Program. I have worked on the wiki report for both the nonlinear doser and the rapid mix design.
