

pdk9

Being new to the project and a student from the Hotel School, I had a very difficult time trying to understand the information that I was looking at and was going to be using on outreach projects. Since I have experience with photoshop programs and working on logos, however, I have been primarily assigned to put together material that will promote AguaClara and raise awareness of our project. This includes

- Learning about AguaClara, since I am new to the team and am not an engineer, so that I can create accurate Outreach material
- Designing various sketches of a new [logo](#) that reflects what AguaClara is about
- Making [posters](#) (used for conferences and for the entrance of Hollister)
- Assisting in mainting and updating the [Outreach](#) team pages, so that it all files from this semester are easily accessible by future teams
- Creating updated [pamphlets](#)
- Working on literature/marketing materials, such as writing the [informational packet](#) with teammates
