## Ashleigh's contribution page

### Spring 2011 PSS team

Currently, I am working on the Plate Settler Spacing team. I joined aguacalara this semester as a second semester sophomore, so I'm still learning the ropes. As a team, we have been running multiple experiments with variable tube sizes and lengths in model of the plates in the aguacalara plant. On our first report, I contributed by writing the introduction and future work. In this semester, I will be mainly helping with experiments and whatever my fellow team members need.
