

AguaClara Engineers

AguaClara Engineers

Student members of the AguaClara team at Cornell are eligible to [apply](#) for 3 month to 2 year field assignments to assist with [training and capacity building](#), [technology implementation](#), [performance documentation](#), and [dissemination](#). This program will likely grow as demand for the AguaClara technology picks up and the number of implementation partners multiplies. The 1 year and 2 year terms run from summer to summer with a goal of maintaining project continuity with some overlap with the current AguaClara Engineers. The AguaClara Engineers are hired through our in-country partner organization and are paid volunteer wages designed to cover all expenses. Some language proficiency is required and language skills will be developed with short, intensive language training in-country.

Read [reflections on a year as an AguaClara Engineer](#) by Carol Serna.

If you are interested and would like more information, please contact [Monroe Weber-Shirk](#).

Funding sources

[Lindbergh Grant](#)

[Fulbright Scholarship](#)

[Peace Corps](#) (working to develop a connection so that Peace Corps offices in Honduras can request a Cornell Engineer with expertise in AguaClara)
