Temperature Contours

Check your Understanding

Consider the following steps:

1. Invert the stiffness matrix to determine the nodal temperature values.

2. Plot the temperature contours using nodal temperature values.

Steps 1 and 2 take the same amount of time.

Step 1 takes a longer time than step 2.

Step 1 takes a shorter time than step 2.

(To see the answer, go to the *2D Conduction* section of Module 1 in [our free online course on ANSYS simulations](#). You need to sign in to [edX.org](#) to access the course.)
