

# Done - steps to be done

The steps to making an integration of 'Done'

## What are the steps to being 'Done'?

- functional requirements (what)
- **define acceptance criteria - technical and functional**
- specs / design (how)
- design review
- code
  - parts per integration\*\*\* exporting the data
    - firewalling and networking plumbing resolve
    - adapters and interfaces set up
    - workflow -> steps within an integration
    - ingestion
  - code review
  - unit test - one side of integrations
- System test\*\* end to end test - one pair of integrations
  - integration - business process test - multiple integrations at once
  - load test when applicable
- signoff by stakeholders (business leads and technical leads)
- cut over\*\* conversions
  - support processes
  - monitoring
  - knowledge transfer
  - documentation
  - ownership of parts
- stabilization
