

Final Project Presentation

Today you are free to work on your pages.

This is the **gateway** to your final/work pages. You can also store your wiki work here temporarily, if you find you are locked out of a wiki page when some one else is editing.

Final Presentation: **Create** a wiki page presentation based on a BAM topic of your own choice. Because this is a 400 level course, your presentation must include original research and some use of primary research material. It must also be visual harnessing imagery considered during this course or that you have researched online. Post your presentation to your own wiki page created here below using your name and choice of title. Your final presentations can be worked on throughout the four week session, but your outline/due date is Friday 6 January (10%) and your publication/due date is Thursday 19 January (30%). This **Final Presentation** is worth a total of 40% of your final grade.

Our office hours are flexible, if you wish to talk about your topic, just begin a conversation in comments box on your presentation page and we will respond.
