ChemIT's conventions for editing this wiki site

Most pages will use the "children:depth=3|excerpt=true|style=h3" code to show child pages.

New pages with substantial text should exist under a page showing its children.

- Thus, most of our text information lives at the "tips" of the hierarchical tree.

Most pages should have an "excerpt" tag to describe the page when listed within another page.

Restricting a page's access to just active Cornell NetID's
