

# Ideas for the Future

Ideas to consider

- In Bissett space where will people print if they need to (rather than having to go downstairs)?
- Support--how can students get in touch with student operators and librarians for help with technical or research issues (IM, CUSeeMe?)
- Will there be a central place where students can store materials and get to them from other computers if they have to move?
- How can they capture their work (if no CopyCam then digital cameras and a way to transfer those images to their own media)?
- Collaborative switching of devices (Teamwork software?)
- iPads
- Wacom tablet
- Macs specifically for Bissett space
- Interactive whiteboards
