

Tues+Wed, June 18-19 AL

- Bought single speed master link. Gary from the Bike Rack in collegetown says single-speed chains are the widest, so we should generally be OK using a single-speed chain for our erg.
- Got three feet each of 8-32, 1/4"-20, and 10-24 threaded rod. Need nuts for them too. We have bolt cutters in the lab, so no need to go to Emerson to chop em up.
- Took off bottom bar and put the handle bungee and chain inside of the top bar so it resembles the original erg in having only one bar. The handle bungee system is upside down, so we have to take it out, reassemble it, and put it back in.

I have to talk to Joe Rogan to:

- get reimbursed for rods
- order parts: connecting links for #25, idler sprocket for wheel (maybe)

Fix the roof hatch at Barton. Snee Hall rooftop is open to public. ROTC rooms in Barton are sometimes open.
