Systems Engineering

The Systems Engineering Minor is administered by the Systems Engineering Program.

Students intending to complete the minor should consult with the Professor Peter Jackson (255-9122, pj16@cornell.edu) who can approve specific course selections. Students must complete MAE 5910, MAE 5920, CEE 5900 and a fourth course with some systems content. This option requires a team-based M. Eng. project for at least 4 credits that includes some systems engineering. For more information consult http://www.systemseng.cornell.edu/se/academics/minor.cfm.
