

Oral Histories of Chemistry Faculty

We will only focus on this after we create an "About" section. And we must confirm how this is to be done. And then do it. Start with some mock-ups? Next step: Invite A&S Comm. staff (Jen).

Status

- Investing on creating this resource will follow [us creating a CCB "About" section](#), at the top level.

Ideas to on the "how"

Create a new page under the faculty page

- Decide on the page's name, and location in hierarchy and what points to it (automatically and otherwise) from the CCB web site.
- Determine other text for that page, such as an introduction at the top.
- On that page, list faculty with an oral history recording and point to that recording. (Or page above, at eCommons?)

Information about the oral history links discussed here

Many of the distinguished Chemistry professors have been interviewed as a way to get a (1-1.5 hr) snapshot of their career trajectory and high-lights.
