Storage thoughts

Large AND fast storage?

http://www.fusionio.com (3/2013)

- Some (all?) is through PCI-Express slots.
- Combo of flash and spinning disks.
- They offer both in-machine cards and attached "box" storage solutions.
- Costs?!
  - Low-end card seems available around $10,000. A few for les, and many for much more

[...]
If you need help with a different storage solution let me know. We have quite a few **Infortrend** boxes at some departments at Cornell and they have been really happy with them, that might be a good option. You can do iSCSI or direct attached.

Lemme know if there is something I can help with, and I will get answers tomorrow for you.

Cheers, Jon
