

Statistics

UPDATE!

This information pertains to the server the old Mann website ran on. Webalizer is not running on the new server so do not attempt to use these old instructions.

To generate monthly podcast usage statistics, go to <http://www.mannlib.cornell.edu/stats/webalizer/> and follow these steps:

1. Click on the link for the month to be reported on.
2. Search for the "view all URLs" link and click on it.
3. Select Edit-->Select All to capture the contents of the entire page for that month.
4. Select Edit-->Copy to copy the contents.
5. Open NotePad and select Edit-->Paste to paste.
6. Save the NotePad file.
7. Open the NotePad file in Microsoft Excel, indicating that the file is space delimited.
8. Sort the spreadsheet by column E, which is the URL, in order to collect the URL's beginning with /computing/postcast/ together.
9. Delete the entries before and after the /computing/postcast/ group.
10. Save the spreadsheet and attach it to this page.
