

The 5 Choices to Extraordinary Productivity

The Challenge

In today's world, there is a greater abundance of opportunity for both organizations and individuals to accomplish extraordinary goals. However, all too often, the demands of our jobs, coupled with the barrage of information coming at us from so many sources (e.g. texts, emails, reports, tweets, blogs, web-sites, etc.) is overwhelming, exhausting and distracting. The sheer volume of distractions threatens our ability to think clearly and make good decisions. If we react to these stimuli without careful discernment, we will sink into a sea of irrelevancy and fail to accomplish the things that matter most in our professional and personal lives.

The Solution

FranklinCovey's [The 5 Choices to Extraordinary Productivity](#) inspires participants to apply a process that will dramatically increase their ability to achieve life's most important outcomes. The process measurably increases productivity of individuals, teams, and organizations. Participants make more selective, high-impact choices about where to invest their valuable time, attention, and energy. Supported by science and years of experience, this solution not only produces a measurable increase in productivity, but also provides a renewed sense of engagement and accomplishment. **This course features a hands-on technology teach, showing participants how to use the FranklinCovey productivity concepts within Microsoft Outlook.**
