History regarding various pages:

Brett's Cornell University main directory entry, done when he obtained his NetID:

- <http://www.cornell.edu/search/index.cfm?tab=people&netid=bpf46>

Brett's faculty entry in VIVO, done per special request from Oliver on 3/10/14:

Brett's faculty entry within CCB's web site (fed from his VIVO data and locally hosted photo):

- <http://chemistry.cornell.edu/faculty/detail.cfm?netid=bpf46>
 - Fixed 5/29/14. Per BobM (A&S Comm), "Turns out the original culprit was the LDAP query looking for data that doesn't exist. I was actually able to pair down that query and add some tests to make it a bit more "odd-entry-proof."

 - Still needs "Keywords", from Brett.
