

NMR file sharing, Linux lab rebuild, and server decommissioning

Project page for current NMR work.

[Summary inventory info on relevant wiki page](#), with pointers to ChemIT's internally-shared documents.

NMR file sharing, PCs, Linux, and Macs

NMR uses SFS shares to enable researchers to copy files from instrument computers (Windows and Linux) to their own computers (Windows, MacOS. Any Linux?!)

NMR Linux lab rebuild

ChemIT (mostly Lulu) assisting Ivan on reconfiguring his Linux-based instrument computers.

NMR server likely to be decommissioned

ChemIT believes NMR's aged server can be retired (turned off), with just a few changes.
