

# Latex Tutorial

## Latex help:

Some common functions using embedded Latex:

- Equations
- Tables
- Lists
- Font manipulation

To use Latex while editing your simcafe page, Insert > Wiki Markup

Inside the Wiki Markup, copy paste the following code:

```
{latex}
```

```
{latex}
```

Within the two two Latex, type in the necessary Latex code and make sure to preview frequently!

**Equations:** <http://en.wikibooks.org/wiki/LaTeX/Mathematics>

**Tables:** <http://en.wikibooks.org/wiki/LaTeX/Tables>

**Lists:** [http://en.wikibooks.org/wiki/LaTeX/List\\_Structures](http://en.wikibooks.org/wiki/LaTeX/List_Structures)

**Font manipulation:** <http://en.wikibooks.org/wiki/LaTeX/Fonts>

For a more comprehensive tutorial for all of Latex, refer to this comprehensive link: <http://en.wikibooks.org/wiki/LaTeX>

For pure syntax, refer to this comprehensive link: <http://www.ntg.nl/doc/biemesderfer/ltxcrib.pdf>

Try using the Ctrl+F function to quickly find what you need.
