# Library Technical Services Home

This is the new LTS Home Page. Please excuse our mess while we reorganize this space!

Our Mission:

Library Technical Services (LTS) creates and maintains content used by the Library's online catalog, e-resource discovery systems, and numerous searching and delivery tools for all collections. We keep the collections vital and current by licensing and purchasing new materials, describing and organizing them for convenient use, and preparing items for preservation as necessary. We also support bibliographic access to special collections, rare, and archival materials, making these unique resources available for scholars worldwide.

See LTS Priorities (FY23)
