

Bulk Import Profiles (LTS Procedure #46e)

Scope: Deprecated, these profiles were for Voyager. *Import Rules:* This chart describes the "rules" associated with each of CUL's bulk import projects.

Note: Before running Bulk Import jobs, verify that MARC Character Set Mapping is set correctly for the records to be imported.

Contact: Jenn Colt

Unit: Batch Processing and Metadata Management

Note 1: For all bulk import into the production database, owning library = cu

Note 2: If you click on the "Item Information" tab in Sys Admin, you can check the "Number all copies" radio button and enter "1" in the following field to automatically enter copy number "1" in records created.

Note 3: Check "Batch OPAC Suppress" box under "Rules" tab

Note 4: Choose "MARC Character Set Mapping" based on individual project

Note 5: NetLibrary1 and NetLibrary2 represent similar bulk import profiles, though their rules have sometimes varied.

Note 6: Choose default mapping location based on individual project

Note 7: Check "Leave OPAC Suppress Unchanged for Replaced and Merged Records" box under "Rules" tab.

Note 8: For codes in the "Mapping" column, "None" means that no holdings are created. For those marked "Non-LC," the location is taken from the 952\$b and the textual call number is taken from the 952\$h. For those marked "LC," the location is taken from the 952\$b and the call number is taken from the 050\$a and \$b.

Note 9: Copies 852 \$b, \$k, \$h, \$i and \$m to the MFHD.
