History of CISER service evaluation

- A&S's CISER account for researchers

History

In FY13, we evaluated subscribing to CISER's computing services. We discovered our usage was low that we were allowed be be placed under A&S's subscription, starting July 2013.

Adding any new user does not cost us more. Please use this service if it can help your research!

NOTE: If a research unit within CCB has a project in the future with significant usage requiring additional funding, Oliver is to let CISER know so they can set up a separate account for that project.

Subscription tracker page:

http://ciser.cornell.edu/beta/usage/

When CCB was a subscriber, Oliver's NetID was authorized to view CCB's data. Now that we're under A&S's subscription (July 1, 2013), Oliver didn't get access to usage data until 5/22/14.

- Now Oliver has access to CCB's usage data.

In January 2014, IT@Cornell published a story on the successful outcomes CCB researchers experienced from this collaboration:
