

7-15-2015

Agenda

Attending: Camille, Sara, Tobi, Gabriel, Matt, Nick
Absent: Jim, Kelee

Digital signage from <http://www.digitalsignage.com/> (open source):

- free tier with StudioLite app (1 GB storage; unlimited screens)
- runs on iPad, Chromebox, etc
- elevator signage; circ display; maybe not interactive screens unless for special things
- Pro paid enterprise version; \$99/mo for paid version w/unlimited screens, storage and access to mediaSTORE
- Matt will investigate; Gabriel will add to Circ display

SUMA

- made 12 commits since last meeting (most on data analysis and reporting)
- changes at NCSU and in frontend so some delays
- Nick will upgrade to the latest version of SUMA before the semester starts

Interactive touch screen

- Display of special collections or ebooks? Possibly use From the Vault images? Maybe things from Michael Cook
- Matt trying Yuba? Yoba? interactive touch screen software

LabStats 6

- Gabriel can run LabStats 5 and 6 in parallel until reporting is set up and we know it works
- Gabriel will set it up in Stone or something and let Nick know when data starts coming in
- CIT uses it for showing lists and maps of what computers are available or not (terrible interface) and we use that info for our circ display
- We can unpublish the maps on the Labstats site and direct people to our website
- Gabriel will also check if we can data to application level

One Button Studio

- Matt has it almost all the way live (just sound to fix)

Gate Counter

- Tobi will show us how it works next time
- Can combine data to see how many people are in library vs. how many people are on 2nd floor?
