Functionality Working Group

Membership:

Jim DelRosso (lead), Wendy Kozlowski, Danielle Mericle, Michelle Paolillo, Oya Rieger, Melissa Wallace

Active Dates:

April - June 2014

Summary:

Building on the work done by the Repository Inventory Subgroup, the Repository Functionality group focused efforts on developing on a system of categories or tags to describe CUL's repository systems. The intention was to use those to identify gaps and redundancies within CUL repository landscape. Ultimately, effort was shifted to development of Institutional Repository user stories.
