Evan Greenberg's Individual Contribution Page

Team accomplishments:

- Developed new synthetic wastewater stock recipe
- Maintained UASB reactors to keep them functioning
- Characterized contact time of settled bed

Goals for future work:

- Reduce the issue of plugs forming in AFB reactors
- Assemble and operate AFB reactors
- Characterize reactor performance

Personal Goals:

- Gain experience working in a lab and using various software (proccoda, process controller)
- Improve communication and problem solving techniques
- Create a system that can be implemented to help people in need
