

Metadata for Video: A Primer

Tre Berney

April 17, 2015, 10:30am - 12:00pm, Olin 106G

Description

Tre Berney will discuss sources, reasons, and challenges in dealing with video and its complexities in regard to metadata. His presentation will touch on a variety of things, including: • Why technical metadata is important to moving images & how it works • The importance of identifying the metadata needs of different kinds of institutions • Applications of video metadata at CUL and the Lab of Ornithology • The technical challenges of our current archive and delivery systems, including our implementation of Kaltura, an open source media streaming solution
