

EPA P3 Phase I Washington DC trip logistics

No personal cars allowed for student transport.

Have at least 2 drivers per vehicle so drivers get a break (switch every two hours).

Use [Cornell's Fleet Garage](#) to rent vehicles and make these reservations in February to ensure that we get vehicles.

Student drivers need to apply for permission to drive through Risk Management. Accounts Representative for CEE, [Alita Howard](#), can provide and process the forms.

Use the [ECONO LODGE METRO](#) at [6800 LEE HWY, ARLINGTON, VA 22213](#) 800-916-4339 for an easy drive into DC and a good metro location.

Visual design of any apparatus is important. Fluidized sand beds and fluidized flocs have been good hits with the public.

Poster should have a few large engaging images and very little text.

Project a video about AguaClara on the poster.

Consider taking along the scale model of an AguaClara plant.

Take along brochures advertising Cornell, the AguaClara program, and recruiting for environmental engineering.

Add labels to setup

Additional poster placed closer up front about overall mission of AguaClara

Text on posters must be large enough to be legible from 3 m.
