Snapshot from May 2016

Person <NetID>	Summary reason	Notes
Alan Giambattista	Lecturer: No file share directory created.	~\$7.00 (April 2016). Testing center data of very high value.
Leaf Turner	Lecturer: No file share directory created.	~\$6.00 (April 2016).
Glenn Case	Lecturer: No file share directory created.	\$5.50 (April 2016, under min. amount).
Phil Krasicky	Lecturer: No file share directory created.	\$7.73 (109GB, April 2016)
John Miner/Craig Wiggers	Department manager	JohnM: 405GB (lots of music; expect much less for May bill.) Criag: Considering turning off EZ-Backup service
Jenny Wurster	Technical staff (directory exist; a lot of data)	May have too much data. 80GB of data being backed up (April 2016). Too much data to store at Arts & Sciences file share without prior approval from Frank Strickland.
Vince Kotmel	Technical staff (directory exist; a super-lot of data)	729GB (\$26/mo) of data being backed up (April 2016). Too much data to store at Arts & Sciences file share without prior approval from Frank Strickland.

Notes

- Backups are valuable to protect against not just hardware and software errors, but against human errors, too.
- Restore speed differences between different backup solutions represent different value.
