[Exercises](#)

[Comments](#)

Physics Setup

- Open Fluent from Solution
- If the Mesh Interfaces are gone, recreate them the same was done in Part 1
- Check that the Boundary Conditions were correctly copied
- Under "General", change the Solver to Transient.
- Under Cell-Zone Conditions...
 - Highlight "inner". Click Edit. Copy to Mesh Motion. Check that everything has been transfered
 - Do the same thing for the other 3 blades

[Go to Step 5: Numerical Solution](#)

[Go to all FLUENT Learning Modules](#)
