

Working Space for CUL Internationalization Taskforce (2016-2017)

Charge

- Gather information and report on services CUL currently provides to support Study Abroad or international projects, and to support international faculty, students, visiting scholars at Cornell.
- Gather information about services and support that are being offered by nonCUL units to the same population noted above.
- Recommend a SMART* goalbased model to sustain CUL's support to Cornell's internationalization. This would include what CUL as a whole should do to develop knowledge and skills for supporting internationalization; how CUL units can continuously assess and decide what to continue or to retire in order to best align resources with services for their particular programs/population; how to fully utilize the information gathered and staff suggestions from previous open meetings; and lastly, what criteria to use that would demonstrate success at both the CUL and unit levels.

*SMART stands for *specific, measurable, achievable, realistic, and timebound*.

Final Report - June 2017
