

# 2017-01-25 Meeting notes

## Date

25 Jan 2017

## Attendees

- [Clayton L Birkett](#)

## Goals

## Discussion items

Time	Item	Who	Notes
	Oat lines for genotyping	Clare	ranked on how much phenotypic data they have
	wheat CAP meeting	Clay	<ul style="list-style-type: none"><li>• should load tilling and recombination data (restricted?)</li><li>• for IWGSC RefSeq v1 restricted access to BLAST, JBrowse, Maps require email confirmation of data access agreement</li><li>• imputation, Flapjack, tutorials for applications</li><li>• expression data change to TGACv1 <a href="https://wheat.pw.usda.gov/WheatExp/">Stephen Pearce, https://wheat.pw.usda.gov/WheatExp/</a> <a href="http://www.wheat-expression.com/">Cristobal Uauy, http://www.wheat-expression.com/</a></li></ul>
	KNetMiner	Clay	create link to public version? or use our own version without Arabidopsis reference?
	Oat haplotag genotype data added for Cornell lines	Clay	

## Action items

- ☐ [Clayton L Birkett](#) - when loading GBS data update allele conflicts
- ☒ Clayton L Birkett - Cornell oat lines, publication uses IAXXXX for line names (2013 Elite Oat publication), update trial\_code
- ☐ JBrowse track for recombination data
- ☒ Clayton L Birkett - email URGI to ask if Wheat CAP members can blast RefSeq v1, make separate list of users
- ☐ tutorials - BLAST, trials and traits table\
- ☒ Wheat Expression UK - can we link to this? the WheatExp uses POST request to query that do not accept external links. The code is on github so we could create our own server or suggest changes that allow external links.
- ☒ ask Keyway to make links for T3
