

arXiv is hiring!

We seek an experienced **software developer** to work on the next generation system of [arXiv.org](https://arxiv.org) - the premier open access platform serving scientists in physics, math, computer science, and other disciplines. As a member of the arXiv "next generation" team (arXiv-NG), this person will design and develop a new integrated, modular system that will continue to provide the scientific community with access to the latest research results. For 25 years, [arXiv.org](https://arxiv.org) has enabled scientists to share papers within scientific communities and to publish "pre-prints" that are scientific papers shared prior to a paper being published in a journal. [Apply online.](#)

Please share widely!
