Mesh

Close the **Model Editor**, then click on **Mesh** in the workflow.

Set Mesh Size & Controls

Retain the default mesh settings. AIM will prompt the user to fix the boundary layer before generating the mesh. [Click on **Boundary Layer** under **Mesh Controls**](#). Select the faces of the flow volume.

Generate Mesh

Return to the **Mesh** task and click **Generate Mesh** under **Output** or at the top of the Mesh panel. AIM should detect that you are ready to generate the mesh and highlight the buttons in blue.
