

# Christina Chin (ckc78)

This is my first semester working with AguaClara. I am a junior Applied Economics & Management major, and am a member of of the Public Relations sub-team. The Public Relations sub-team is working on creating a brand book and rebranding, from designing a new logo to choosing standardized colors and fonts. I will be using my photography skills and design software to take headshots and create other marketing materials. Other projects our sub-team is working on include updating brochures, creating apparel, managing social media accounts, and creating a video to market AguaClara and its new technologies.
