JAMF (Casper) in A&S (mock-up)

A page to demonstration what JOC's documentation might look like if within CU Confluence using specific conventions particular to Confluence.

- Add a link to A&S JAMF Pro change log, if not here.
  - Perhaps in A&S IT's SharePoint instance?

Conventions used here or proposed

- Every page has a brief page description.
  - This is because all page titles and descriptions available to be made visible to any page above.
- Pages are created (and possibly moved around) to ensure a rationale hierarchy.
- Pages higher in the hierarchy dedicate more space to describing sub-pages via "Children Display" code (think "branches"). And pages lower in the hierarchy have more detailed info (think "leaves").
  - If a page starts having lots of info, consider breaking it up into sub-pages if logically related.
    - The resulting higher-level page can summarize and guide finding the desired information.
- A search box can quickly find any content, assuming we have a dedicated Confluence space.
  - See top-level page to see this in action at Chemistry/ Physics.
- URLs of pages within the site, cited by other pages within Confluence, should use Confluence's linking and not explicitly citing it's URL.
- URLS shared outside of Confluence (say, via email) should ALWAYS be the smaller ones ("Tiny Link", in Confluence parlance), and NOT the ones from the Address bar. Example for this page:
  - https://confluence.cornell.edu/x/xbQcFQ
  - Shorter URLs are more robust within emails. And, importantly, these URLs persist if page is renamed or moved.
  - Pressing the "k" key instantly provides you the short URL, pre-highlighted so easy to copy. That's one way to get that URL, and there is a reminder of this option every time it's used. 🙂

Sub-pages

The following is a list of auto-magically generated list of pages under this top-level page, along with brief content descriptions.

Example of using a TOC for data within a fuller page

Sometimes a lot needs to be put in one page rather than split up into sub-pages. A Table of Contents (TOC) auto-magically generated on that page can help orient a reader.

JOC Teams (Groups?) purpose, membership and contacts

The three current Teams are Production, Quality Control (QC), and Documentation.

- Documentation Team — Members: Member 1, Member 2, Member 3. Purpose: Get text from Fred or meeting's notes. Summarize for here, and fuller info can be on page itself.
- Production Team — Members: Member 1, Member 2, Member 3. Purpose: Get text from Fred or meeting's notes. Summarize for here, and fuller info can be on page itself.
- Quality Control Team — Members: Member 1, Member 2, Member 3. Purpose: Get text from Fred or meeting's notes. Summarize for here, and fuller info can be on page itself.
