

Search v0.3

Search version 0.3

Start date: 04 May 2018 ; **release date:** 14 May 2018

Source code: <https://github.com/cul-it/arxiv-search/releases/tag/0.3>

Bugfixes and usability improvements based on feedback from [release 0.2](#).

arXiv's search interface is available here: <https://arxiv.org/search>

Features

- Retain sort order and page size preference.
- Use announcement date (descending) as default sort order.
- Add tooltips to category identifiers

Bugs

- Author name links from abs page/search results do not handle surname prepositions correctly.
- Wildcards don't work as expected in ACM, MSC classification fields.
- Order of initials are not always taken into account when searching by author name.
- Some edge-case queries still produce 500 errors.

Other

- More efficient reindexing.
- Better control over indexing rate.
