

Adobe Creative Cloud

Overview

Use of Adobe Creative Cloud requires a license subscription with Adobe. Cornell faculty and staff can request a Named User license through their local Technical Support Provider (TSP). Cornell students must purchase a license directly from Adobe. Please see the [CU Software Adobe licensing page](#) for more information.

Creative Cloud applications are available, to those with a licensed subscription, in the CAD room.

Poster Printing

CNF Computing recommends designing posters in [Powerpoint](#) if at all possible. Photoshop and Illustrator appear to use custom print dialogues which can make selecting the proper printing options difficult.
