

FileMakerPro server run by Chemistry IT

Fall 2018, Chemistry IT stood up a FileMakerPro server because the A&S IT's server had run out of DB slot

Summary

Chemistry IT is running a FileMakerPro server within an Amazon (AWS) Windows server.

- Using current security certificates (unlike A&S IT's server), FWIW.

Databases in Chemistry

Number of DBs	Summary characterization	Current location	Proposed location	Notes
30	Course/ class DBs	A&S IT's FMPPro v14 server	n/a	Won't work with v17 clients (server version too old) Q: What if Cynthia migrates some/ all to Canvas (was Blackboard), in Spring/ Summer/ Fall 2019?
36	Operational DBs	A&S IT's FMPPro v11 server	Chemistry IT's v17 server	
??		Individual's DBs, not running off of a server	n/a	Worth discovering and managing them "better"?

FYI: Databases in Physics

Number of DBs	Current location	Proposed location	Notes
10	A&S IT's FMPPro v14 server	n/a	Won't work with v17 clients (server version too old)
